PROFILE SUMMARY

I am a frontend developer from Belgrade, and my love for nature during my geology studies led me to explore technology and design, inspiring me to merge these interests through web development. Being a complicated and unpredictable topic, geology has taught me to look for innovative answers to problems and approach them with an open mind. In the last couple of years, I've improved my knowledge of HTML, SCSS, and JavaScript, working with designers and back-end developers to develop effective and intuitively clear platforms. I am a team player with the willingness to work alone too.

WORK EXPERIENCE

Frontend Developer | Quantum AutoMarket

- Built user-friendly interfaces using .NET MVC, significantly enhancing the user experience.
- Took full responsibility for frontend and design work, independently managing the design process to create an intuitive layout tailored to user needs.
- Collaborated closely with developers to integrate design elements with backend functionality, resulting in a cohesive and efficient platform.

2024 - PRESENT

UX/UI Developer | Concentrical

- Worked on multiple projects, primarily utilizing Django Wagtail, and successfully managed two projects simultaneously.
- Quickly mastered Django Wagtail, enabling effective training for new colleagues and accelerating their journey to independence.
- Collaborated with backend developers, testers, and project managers, gaining a thorough understanding of all project aspects.
- Engaged in smaller backend tasks, contributing to the overall enhancement of project quality.
- Actively collaborated with designers, sharing ideas and suggestions that improved the user interface and experience, enriching our collective work and leading to higher-quality solutions.
- This role greatly contributed to my professional growth, developing skills in time management, problem-solving, and effective communication while demonstrating a proactive approach to learning and continuous improvement.

2022 - 2024

PROJECTS

Concentrical Website

Independently developed the Concentrical website based on provided designs, utilizing HTML, SCSS, and JavaScript for the front end. Implemented templates within Wagtail CMS and created comprehensive documentation, including user guides for adding blocks in Wagtail.

College Confidential

Responsible for maintaining the platform, redesigning existing pages, and creating new Wagtail blocks to enhance user experience. Refactored existing code to improve its structure and maintainability, managed tasks within the Django admin, and handled the complete frontend development using HTML, SCSS, JavaScript, jQuery, and Django.

LiaisonEdu B2B

Took the lead in creating the LiaisonEdu B2B platform from scratch, utilizing HTML, SCSS, Tailwind, and JavaScript for the front end, while effectively responding to customer needs. Incorporated Wagtail CMS templates to meet client requirements and developed CSS animations as part of the overall design.

EDUCATION

Faculty of Mining and Geology

2018 - 2022

- Master of Geology focuses on Geology of Oil and Gas

Faculty of Mining and Geology

2014 - 2018

- Bachelor of Geology focuses on Petrology and Geochemistry

COURSES

Education center Artefact

2022

- Graphic Design Course (Photoshop, Illustrator, InDesign)

IT Bootcamp

2020

- Web development (HTML, CSS, JS)

SKILLS

HTML

Javascript

SCSS

Wagtail CMS

jQuery

HOBBY

I like to play around with colors and forms when I'm creating polymer clay jewelry. At this stage of creation, I explore various combinations of colors and design techniques, just as I use different color combinations in CSS to create charming and functional interface design. My love for cooking adds another layer to my innovation as I experiment with flavors and recipes, much like I do with coding to build functional solutions. The time outdoors, rock climbing, traveling, and discovering new cultures are also appealing to me.
