- Tailwind
- JavaScript
- Wagtail CMS
- Django template language

Operating systems
- macOS
- Windows
- Linux

Tools
- Visual Studio Code
- GitHub
- Docker
- Jira
- ClickUp
- Figma

WORK EXPERICENCE

UX/UI DEVELOPER · CONCENTRICAL
August 2024 - Present

Using .NET MVC, I built interfaces that improved the user experience. I took charge of frontend and design work handling the design process on my own to create an attractive and easy-to-use layout that met user needs. I worked with developers to combine the design with the backend functions, which led to a productive and unified platform.

UX/UI DEVELOPER · CONCENTRICAL
April 2022-August 2024

At Concentrical, a company dedicated to student success, I worked on both frontend and some backend development. I created intuitive interfaces using SCSS, HTML, and JavaScript, and developed Wagtail templates with the Django Template Language. I collaborated with backend developers to integrate dynamic templates and ensure seamless data flow. My focus was on creating responsive designs that worked across devices, delivering an optimized user experience.

LANGUAGES

Mother tongue: Serbian
Other languages:
- English - intermedite
- Italian - basic

HOBBY:

In my free time, I enjoy crafting clay jewelry. Also, I'm enjoying spending time in nature, rock climbing, traveling, and exploring different cultures.
